

SOUTHEAST TELEPHONE
Fire, Life & Safety Communications

Empower Your Brand with the STS-6741 Wholesale Platform

Deliver an emergency-communications solution that's fully yours, powered by a proven 4G/LTE outdoor phone & service built for reliability, compliance, and profitability. The STS-6741 gives you everything you need to launch or expand under your own name — turnkey and dropship to the customer.

WHY RESELLERS CHOOSE STS-6741

► High-Margin Revenue

Capture top-line recurring & one-time revenue paid directly to you — monthly residual plus equipment margin — not a one-time commission.

► Your Brand, Not Ours

Partners can sell device + monthly service under a custom white label. Logos, agreements, and pricing stay yours.

► Dropship, Turnkey Solution

STS-6741 is an all-in-one 4G/LTE solution — hardware, enclosure, power, and service — running on a dedicated wireless network. Same day purchase and activation — No truck roll. No trenching. Overnight delivery. Next day service.

► Full Operational Control

API capabilities for activation and NG911 / E911 provisioning give you complete control of quotes, turn-up, and lifecycle. Plus, custom portal troubleshooting puts you in the repair driver seat — without waiting on a ticket queue.

► Direct NG911 / E911 Connectivity

Our streamlined auto-dial system connects callers directly to local 911 dispatch the moment the handset is lifted. Emergency calls use a carrier-grade NG911 / E911 routing network with nationwide PSAP coverage and dispatchable location delivery. You sell the brand; we keep dispatch accurate.

► 24/7 Remote Support

U.S.-based onboarding plus 24/7 remote support. Your team is never the last voice on an emergency phone.

BUILT FOR GROWTH

Whether you're a custom white-label partner, VAR, interconnect, or OEM, our STS-6741 solution helps you:

- **Grow your product portfolio**
- **Enhance cash flow with immediate profit**
- **Add new, one-time & recurring revenue streams**
- **Increase enterprise value**

ALL-IN-ONE STS-6741, READY TO RESELL

Simplify emergency communication for your clients

Give your customers a complete outdoor emergency phone — pool, splash pad, park, or gated amenity — built for the compliance* inspectors expect. Finished SKU. Dropship, turnkey solution with online customer equipment purchase and service activation. You advertise, ship, and profit immediately.

**For your specific location, consult the local health department, building department, or an ADA expert, as AHJ enforcement can vary. Resources like the ADA.gov site or state pool regulations provide further guidance.*

End-User Features

- ▶ Direct 911 on handset lift — registered pool name, address, and callback
- ▶ Landline-like two-way audio in a handset inspectors recognize
- ▶ NEMA IP66 weatherproof, tamper-resistant outdoor enclosure
- ▶ Dedicated 4G/LTE cellular service eliminates copper, conduit, and trenching for new builds or retrofits.
- ▶ Standard 120V power with battery backup up to 24 hours
- ▶ Auto-dial 911 outbound; inbound test calls accepted
- ▶ Casual, two-way voice options available for counties that prohibit auto-dial pool phones

Options That Drive Productivity

▶ API activation, provisioning & support

Turn up lines, provision NG911 / E911, and manage lifecycle from your own custom portal. Complete control with remote management for real-time troubleshooting tools and support.

▶ 24/7 remote support

U.S.-based engineering behind every live unit. Activation, signal checks, and inspector-day support remotely.

▶ White-label commercial packaging

Sell device + monthly under a custom white label. Your product, your service, your profit.

▶ Related life-safety SKUs

Elevator phones and FACP LTE / AES mesh when the job is bigger than the pool deck.

YOUR BRAND. YOUR CUSTOMERS. YOUR CONTROL.
